PROJECTS

WEATHER APP

<https://github.com/TKingK2/weather>

The Flask Weather app use Open Weather API to provide users with accurate weather information for any location and displays real time data.

BMI CALCULATOR

<https://github.com/TKingK2/BMI-calculator>

Built with Custom Tkinter, it includes an interpretation of the result based on BMI categories and is a useful tool for health and fitness.

CURRENCY CONVERTER

<https://github.com/TKingK2/Currency-converter>

Built with Custom Tkinter, it supports multiple currencies and uses real time exchange rate data for accurate conversions.

EDUCATION

CS50X INTRODUCTION TO COMPUTER SCIENCE

Coursework includes problem sets and quizzes in multiple programming languages including C, Python, JavaScript and SQL.
