CS50x Introduction to
Computer Science
Online course

Profile

Highly skilled software tester with 5+ years of experience in testing web and mobile applications. Seeking to transition into software development to expand skills and pursue a passion for coding. The objective is to secure a software development position that leverages my skills in software testing and programming, and enables me to learn new technologies and expand my skill set in the software development industry.

Experience

Projects

Portfolio – <https://tkingk2.github.io/Portfolio/>

This website is built using JavaScript, HTML and CSS, showcasing my front-end development skills and other projects.

Weather app - <https://github.com/TKingK2/weather>

This Weather app is built in Flask using Python. It utilises the Open Weather API to provide users with accurate weather information for any location and displays real life data.

Love Energy Savings

UX Tester

06/21 – Present

- Conducted manual testing for web and mobile applications
- Developed and executed test plans, test cases, and test scripts
