PROJECTS

PORTFOLIO

<https://tkingk2.github.io/Portfolio/>

This website is built using JavaScript, HTML and CSS, with a sleek and modern design that is optimized for user experience.

WEATHER APP

<https://github.com/TKingK2/weather>

The Flask Weather app use Open Weather API to provide users with accurate weather information for any location and displays real time data.

BMI CALCULATOR

<https://github.com/TKingK2/BMI-calculator>

Built with Custom Tkinter, it includes an interpretation of the result based on BMI categories and is a useful tool for health and fitness.

CURRENCY CONVERTER

<https://github.com/TKingK2/Currency-converter>

Built with Custom Tkinter, it supports multiple currencies and uses real time exchange rate data for accurate conversions.

EDUCATION

CS50X INTRODUCTION TO COMPUTER SCIENCE

2022 – ongoing

Coursework includes problem sets and quizzes in multiple programming languages including C, Python, JavaScript and SQL.
