- SQLite

---

### PROJECTS

#### WEATHER APP

<https://github.com/TKingK2/weather>

The Flask Weather app use Open Weather API to provide users with accurate weather information for any location and displays real time data.

#### BMI CALCULATOR

<https://github.com/TKingK2/BMI-calculator>

Built with Custom Tkinter, it includes an interpretation of the result based on BMI categories and is a useful tool for health and fitness.

#### CURRENCY CONVERTER

<https://github.com/TKingK2/Currency-converter>

Built with Custom Tkinter, it supports multiple currencies and uses real time exchange rate data for accurate conversions.

---

### EDUCATION

#### CS50X INTRODUCTION TO COMPUTER SCIENCE

Coursework includes problem sets and quizzes in multiple programming languages including C, Python, JavaScript and SQL.
